02.4 FLAT SLINGS

secutex Clip-SC

- Can be positioned during ongoing lifting procedures
- Virtually indestructible
- Permanent dimensional stability

secutex Clip-SC - protective sleeve with a longitudinal opening

The secutex Clip-SC is quickly attached thanks to the mounting slot on the back. It is preferably used whenever flat slings with or without a protective sleeve are required on a case-by-case basis. Important: The Clip-SC makes for easy handling and short set-up times. The secutex protective layer can be placed softly and flexibly on the load, thereby increasing the radius at the critical edges. The leverage forces are extensively distributed and the load remains undamaged.

Optional versatility

secutex Clip-SC is available in versions with different surface finishes and with reinforcement. For more information about secutex and the different surface finishes, see page 14.

easyClip

Similar to the Clip-SC in terms of design, but with different material properties, easyClip is the budget-friendly version of the clip sleeve. For more information, ask us about it!
