

- Can be positioned during ongoing lifting procedures
- Virtually indestructible
- Permanent dimensional stability

secutex Clip-SC – protective sleeve with a side opening

The secutex Clip-SC, which can only be used on one side, can be very quickly clipped onto the lifting gear thanks to the mounting slot on the back. It is preferably used whenever round slings and flat slings with or without a protective sleeve are required on a case-by-case basis. The Clip-SC makes for easy handling and short set-up times. The secutex protective layer can be placed softly and flexibly on the load, thereby increasing the radius at the critical edges. The leverage forces are extensively distributed and the load remains undamaged.

Optionale versatility

secutex Clip-SC is perfectly adapted to the SpanSet round slings and flat slings and is available in versions with different surface finishes and with reinforcement. For more information about secutex and the different surface finishes, see page 17.

easyClip

Similar to the Clip-SC in terms of design, but with different material properties, easy-Clip is the simple version of the clip sleeve. For more information, ask us for advice or visit our website at www.secutex.de.

secutex Clip-SC is available for:

- SupraPlus round slings
- Magnum-X round slings
- MagnumPlus round slings
- Liftfix round slings
- 4-ply CS flat slings
- PowerStar flat slings
- Liftfix flat slings

One-sided secutex-coating, sleeve open at the back for flexible use.
